PROFESSIONAL SUMMARY

Motivated MCA graduate (2026) with hands-on experience in backend and full-stack development using Java, Vert.x, MongoDB, Redis, React JS, Python Django, and REST APIs. Delivered production-level systems including a university placement portal serving 100+ students and an enterprise HR & Workforce Management platform across 13+ modules. Strong understanding of API development, database management, authentication workflows, and responsive frontend integration. Passionate about building practical, user-focused software solutions and collaborating in Agile development environments.

EDUCATION

- | | |
|--|-----------------------|
| • Master of Computer Applications (MCA)
Kristu Jayanti University, Karnataka | 2024 – 2026
64.62% |
| • Bachelor of Computer Applications (BCA)
Sri Krishna Arts & Science College, Tamil Nadu | 2021 – 2024
70.6% |

EXPERIENCE

Software Developer <i>Beepeaks Private Limited, Bengaluru</i>	Jan 2026 – Present
---	--------------------

- Worked on the development and product workflow design of Beepeaks EHRWMS, an enterprise cloud-based HR & Workforce Management platform serving multiple organisations across 13+ modules and 4 user roles (Employee, Manager, HR Admin, Super Admin).
- Collaborated with frontend and backend teams to implement responsive modules for attendance tracking, leave management, payroll processing, expense claims, and real-time notifications.
- Contributed to UI prototyping in Figma and coordinated closely with developers during React JS and Tailwind CSS implementation to ensure design-to-code accuracy.
- Participated in requirement analysis, workflow planning, usability improvements, and Agile-based product development sprints.
- Implemented JWT-based authentication workflows and role-based access control logic across user-facing modules.
- Integrated Firebase Cloud Messaging for real-time push notifications and AWS S3 for document storage.

Backend Developer Intern <i>Software Development Cell, Kristu Jayanti University, Bengaluru</i>	Jun 2025 – Jul 2025
---	---------------------

- Developed REST APIs using Java and Vert.x for a university placement portal supporting 100+ students and multiple administrator roles.
- Designed MongoDB schemas for job postings, student profiles, and multi-round application tracking; integrated Redis for real-time notification handling.
- Implemented round-wise placement workflow logic including eligibility checks, status transitions, and result publishing.
- Tested and validated all APIs using Postman; documented endpoints to support team onboarding and maintainability.
- Participated in Agile sprint planning, estimation, and code reviews within a collaborative engineering team.

TECHNICAL PROJECTS

KJU Placement Portal – *Java, Vert.x, MongoDB, Redis*

Developed backend modules for a university placement portal with role-based workflows for students and administrators. Built REST APIs for job postings, application management, and multi-round result tracking using

Vert.x. Integrated MongoDB for persistent data storage and Redis for real-time notification handling. Tested APIs with Postman and collaborated in an Agile development environment. Supported 100+ active student users with zero downtime during placement season.

Beepeaks EHRWMS – *React JS, Tailwind CSS, Python Django, Firebase Firestore, AWS S3*

Enterprise HR & Workforce Management System built as a Progressive Web Application across 13+ modules. Contributed to frontend implementation in React JS and Tailwind CSS, backend API integration via Python Django, and cloud infrastructure using Firebase Firestore and AWS S3. Implemented payroll computation, PDF payslip generation, and role-based dashboards for 4 user types. Designed and prototyped UI in Figma prior to development handoff.

Voice-Based Virtual Assistant for the Blind – *Python, Speech-to-Text, TTS*

Built an accessibility-first voice-controlled assistant with modular command-processing for web search, file management, and system control. Focused on low-latency audio feedback, graceful error handling, and interaction design for visually impaired users.

Peer Notes Sharing Platform – *Python, REST APIs, MongoDB*

Developed REST APIs for a collaborative academic note-sharing platform with admin approval workflow, role-based access control, and MongoDB indexing for efficient content search and retrieval.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, SQL
- **Frontend:** React JS, HTML, CSS, Tailwind CSS
- **Backend:** Vert.x, Python Django, REST API Development, JWT Authentication, Role-Based Access Control
- **Databases:** MongoDB, Redis, Firebase Firestore, MySQL
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ IDEA, VS Code, Maven, AWS S3, Firebase Cloud Messaging
- **Design:** Figma (wireframes, prototypes, UI handoff)
- **Concepts:** OOP, DBMS, API Development, Agile/Scrum, SDLC, Responsive Design, CI/CD concepts

ACHIEVEMENTS & CERTIFICATIONS

- **Azure Fundamentals (AZ-900)** – Microsoft (2025) **Core Java** – Coursera (2023)
- **Unix/Linux OS Fundamentals** – Infosys Springboard (2025) **Introduction to AI** – Infosys Springboard (2025)
- **Vibeathon Hackathon** – Built a functional web-based event management system as part of a team
- **Advaya 2024, RV Institute of Technology and Management** – Part of the team that won “College of the Event”
- **Bot or Not Quiz (AI-ML Club Neuro-Nova)** – Secured 4th Place
